

DIGI-WAVE

DIGITAL LISTENING SYSTEM

Digi-Wave™ ...for Portable Presentation Applications

Application: The **Digi-WAVE Portable Presentation System** is ideal for team presentations, where two or more presenters combine their skills and knowledge to present as a team to an audience. For example, multiple presenters with similar areas of expertise team up during the same or adjacent sessions so that each presenter may focus on that phase of the presentation that he or she can best handle. This system provides enhanced listening capabilities for audiences attending business conferences, tradeshow and corporate training sessions (and allows the option of audience participation, if required, by adding DLT-100 transceivers to your purchase).

Digi-WAVE for Portable Presentation applications: The new Digi-WAVE (digital spread spectrum--DSS) is a portable, two-way, wireless presentation system in the 2.4 GHz band. Slim, lightweight, and simple to set up and use. With the push of a button, users can access two-way communication for easy presenter/audience participation.

- Portable DLT-100 transceivers for 1-way or 2-way operation
- Portable DLR-50 receivers for digital, 1-way listening applications
- 4-group simultaneous use available in 2-way operation
- Patented frequency-hopping technology minimizes interference from other devices
- Global, turn-key solution: 2.4 GHz operation harmonized for use in most countries
- DLT-100 includes individual charger, with 14 hours of use per charge
- Range: Up to 100 ft outdoors and up to 200 ft* indoors
- Built-in microphone and speaker (DLT-100)
- FCC, CE and C-Tick approved

**Depending on environmental conditions*

DIGI-WAVE

DIGITAL LISTENING SYSTEM

The Digi-WAVE digital listening system proves beneficial as a Portable Presentation System:

- 1) When one or more audience members are hearing impaired.
- 2) When one or more presenters are hearing impaired.
- 3) When one or more presenters have a soft voice.
- 4) When distance from the presenter, background noise and/or poor acoustics create a poor listening/learning environment.

Why Digi-WAVE is a smart choice for Portable Presentation System applications:

- Expandable system that permits multiple presenters.
- Both 1- and 2-way simultaneous communication with audience members is available. Presenters always control the discussion.
- Four groups can be operating simultaneously within a 200-foot range (in 1- or 2-way mode). Outside of this range, other groups can be in operation.
- Completely portable
- More cost-effective than multiple wireless microphones and a mixer.
- State-of-the-art digital technology
- Pure, clear, wireless audio
- 2-year-warranty

The **Digi-WAVE Portable Presentation System** is illustrated below.

(Remember: The DLT-100 is a transceiver that can both transmit and receive; the DLR-50 is a receiver only.)

DLT 100 + DLT 100 + DWS SPK 024

(Two presenters can speak simultaneously; 1-way communication with audience members)

The two presenters can hear one another. Audience members can hear both presenters. Sound is transmitted via remote, powered speaker. The DLR-50 is used to feed the speaker. Optional DLT-100 can be placed in the audience to allow Q&A opportunities.

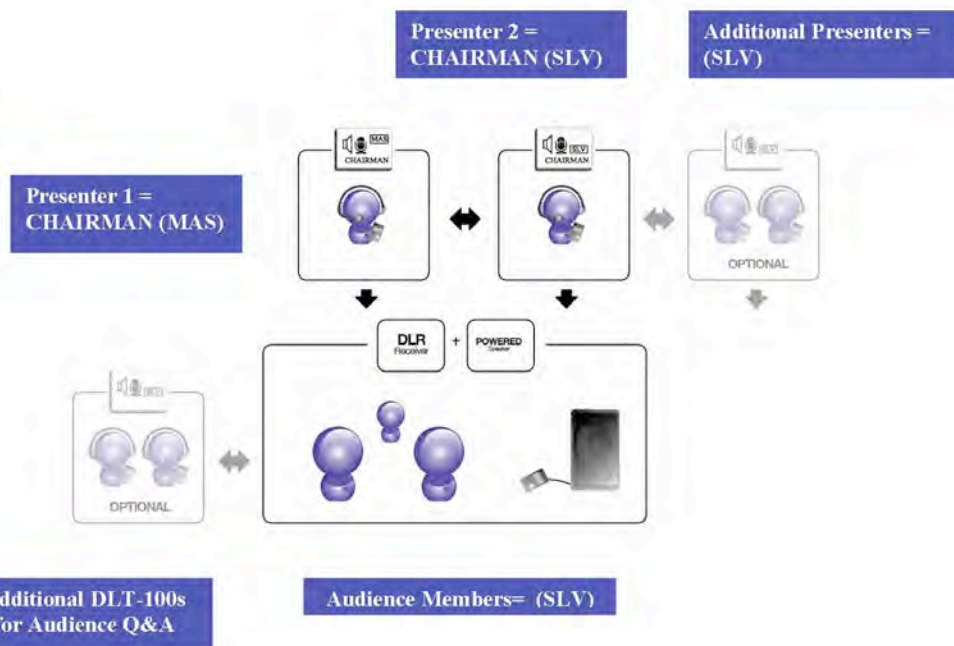

Presenter 1 – 1st Priority

Presenter 2 – 2nd Priority

DIGI-WAVE

DIGITAL LISTENING SYSTEM

The Digi-WAVE **Portable Presentation System (DWS PPS1)** includes:

- 2 DLT-100 Transceivers
- 2 MIC 044 2P Headset Microphones
- 1 CHG 102 Two-Bay Charger
- 2 CCS 044 Silicone Cases
- 1 CCS 043 System Carry Case
- 1 DWS-SPK1 (includes 1 SPK 024 Powered Speaker, 1 WCA 092 Patch Cable, 1 DLR-50 Receiver)

Add-on Options:

- DLT-100 Transceiver (2-way)
- DLR-50 Receiver (listen only)
- Earphone/Headphone/Neckloop

This system is created to provide enhanced listening capabilities for audience members--but offer them no interaction capabilities. Optional DLT-100 transceivers can be purchased in addition to the system package provided – if there will be more than two presenters and/or if the presenters would like to give audience members the opportunity to provide input. If presenters would like to provide additional listen-only capabilities for audience members, optional DLR-50 receive-only units can be purchased. Note: DLT-100 transceivers come with a built-in speaker and microphone, so they can be used with or without an earphone/headphone/neckloop. Optional earphones/headphones/neckloops can also be purchased for audience members listening with DLR-50s.
