DIGI-WAVE

- The quick push of a button allows two-way, full-duplex communication
- Allows for one- or two-way communication between single or multiple groups, with the exception of the Language Interpretation Mode (one-way only)
- Global use – 2.4 GHz harmonized for use in most countries
- 87-bit encryption – offers high level of security; two digital keys create a unique combination
- Patented frequency-hopping technology minimizes RF interference from other devices
- Portability allows most systems to be transported in a single briefcase
- Lightweight. Sleek design. Simple-to-use.
- Neckloop compatible to accommodate hearing aids
- ADA compliance and assistive listening in one package
- Accommodates any number of listeners
